

# CompTIA Security+ Cyber Security Certification

**Dates:**

**Locations:**

CompTIA Security+ is a professionally industry recognised certification that validates the skills necessary to perform core security functions and pursue an IT security career. We are unique to any other provider, where we offer face to face delivery of the course compared to many online providers!

## Entry Requirements

This professional IT course it is comparable to a level 4 in the UK and you should have some experience in IT preferably 2 years with understanding of basic networking, operating systems, and troubleshooting whilst preferably completed either CompTIA A+ and/or CompTIA Network+ or equivalent - note this is not for beginners.

## What topics does the course cover?

The CompTIA Security+ certification covers five major domains of cybersecurity knowledge, focusing on both technical and procedural aspects consisting of General Security Concepts, Threats, Vulnerabilities, and Mitigations, Security Architecture, Security Operations and Security Program Management and Oversight.

## How will I be taught and assessed?

Unlike many other providers we provide a fully onsite delivery approach to delivering this course. It will be led through lecture, hands on lab and reviewing concepts methodology to ensure you fully prepared for the 90mins exam SY0-701.

## Are there any other costs or equipment I need to get?

It may be useful for you to purchase CompTIA Security+ Study Guide but we will provide the learning management system (learner content) and exam voucher for SY0-701.

## By the end of the course what should I be able to do?

After earning the CompTIA Security+ certification, there are strong progression opportunities both in terms of career roles and further certifications. The path you take depends on whether you're aiming for a technical, analytical, or managerial cybersecurity career.

## What are the progression opportunities following this course?

Earning the CompTIA Security+ certification is a strong launchpad into cybersecurity. Once you've achieved it, you have several clear career and certification progression opportunities, depending on your goals (technical specialisation, leadership, compliance, etc.).

ob Roles You Can Pursue After Security+: Security Analyst , Cybersecurity Specialist, Systems Administrator, Network Security Administrator, Threat Intelligence Analyst, Help Desk Tier 2/3 with a Security Focus and many other roles.
