

Level 2 Certificate in Understanding Coding (Online)

Dates:

Locations:

This qualification has a duration of 14 weeks and is designed for learners who want to gain knowledge of coding. The qualification may also support progression into further study in coding or other topics within the digital sector.

Entry Requirements

This qualification is designed for learners who are looking to gain an introduction to coding. It will support the learner to progress into further study and support those interested in progressing to employment in a coding or IT related role. Learners may find it helpful if they've already achieved a Level 1 Digital Skills or Information Technology related qualification.

What topics does the course cover?

To be awarded the Level 2 Certificate in Understanding Coding, learners must successfully complete 5 mandatory units:

- Understand the principles of coding
- Understand terminology used in coding
- Understand coding design principles
- Understand the processes and practice of coding
- Understand the important of communication and project management in coding

How will I be taught and assessed?

You will be provided with online learning materials which covers all aspects of your course. You will be required to complete assessments for each of the units within the course and submit these by the deadline dates provided at induction. You will be allocated an assessor at the start of your course and they will support you to ensure you have a successful outcome. IT skills will

be developed throughout your course and basic English skills will be assessed and discussed on an ongoing basis.

Are there any other costs or equipment I need to get?

The course is free if you meet the eligibility criteria. In order to be eligible for funding, you must be an ordinarily resident in England and be aged 19 or older on 31 August 2026. You will need internet access so that you can respond to email and a digital device that will enable you to type your answers into a web-based platform.

By the end of the course what should I be able to do?

By the end of the course, learners should be able to understand:

- The principles of coding
- The stages of the software development cycle
- Coding terminology and the key principles of writing code
- Different coding types
- best practices in coding
- methods of testing and the DevOps process
- effective communication and project management in coding

What are the progression opportunities following this course?

Learners who achieve this qualification could progress to:

- Level 3 Certificate in Coding Practices
- Level 3 Certificate or Diploma in IT User Skills
- Level 3 Certificate in Programming
